AT A GLANCE

Geelong, Wednesday 21 October 2026

For each bookie we took every change to a runner's win price in the last 6 hours before the jump and found the same change on DynamicOdds and Betwatch. When all three feeds showed a move, we timed who showed it first and by how much. When only Oddsmatic showed it, the move counts as one the other feed missed. Bookies are measured separately, so each row below stands on its own.

	VS DYNAMICODDS			VS BETWATCH		
BOOKIE	ODDSMATIC FIRST	MEDIAN LEAD	THEY MISSED	ODDSMATIC FIRST	MEDIAN LEAD	THEY MISSED
TAB · 513 moves	**98%**	+14s	10%	**97%**	+29s	12%
Sportsbet · 1,505 moves	**98%**	+29s	28%	**99%**	+31s	33%
Tabtouch · 608 moves	**96%**	+6s	6%	**93%**	+5s	5%

HOW TO READ THIS REPORT

Oddsmatic first

Of the price moves that both Oddsmatic and the other feed showed, the share where Oddsmatic showed the new price first.

Median lead

How far ahead Oddsmatic was on a typical shared move, in seconds. The 90th percentile shows the lead on the slowest tenth of moves for the other feed.

They missed

Moves Oddsmatic showed that the other feed never showed within five minutes, as a share of all Oddsmatic's moves. A missed move is a price a client of that feed never saw.

A shared move

Two feeds showing the same runner at the same new price within five minutes of each other. Each move is paired once, so a price the market returns to later is never double counted.

Time before the jump

Each bookie's results are also split by how close to the race the move happened, because the final minutes are where speed matters most.

The charts

For every race, the busiest runner's price over the last 30 minutes on each feed. Where the blue line steps before the others, Oddsmatic showed the move first.
